

Bobo the Air-cleaner

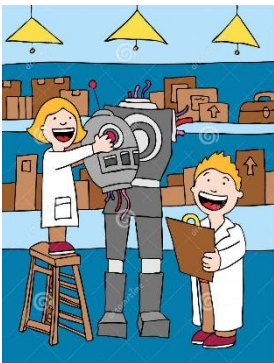

By 3A Sammy Tsang

Last week, Mr Nip asked us to make a robot to help the earth.

First, we drew a plan of our smart machine. I drew the ears of it.

Next, we coloured our machine. We painted it with many beautiful colours.

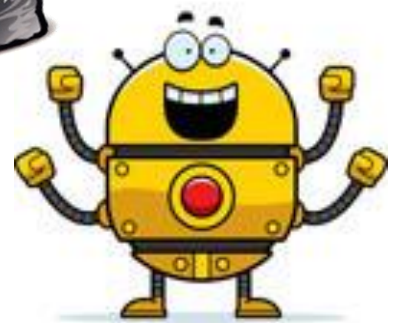

After that, we started to build our machine.

Then, we painted it gold. We called the machine Bobo the Air-cleaner.

Next, we gave Bobo a big bag of rubbish. Bobo was very happy. Bobo ran around in very big circles.

Finally, we talked about our machine. We presented it to the class.

I felt very happy because I liked the robot.
