

# Save the dolphins

I am a friendly dolphin and I am writing because we are facing some problems. We are endangered.

The first problem we are facing is reclamation. You keep turning sea into land. Therefore, there are fewer places where we can live. We will have nowhere to live unless you stop turning sea into land.

The second problem is water pollution. You keep bill and die. Dolphins will become extinct unless you stop dumping toxic waste into the sea.

The third problem is fishing. You keep fishing in areas where we live. Therefore there are fewer fish for us to eat. We will not have enough food to eat unless you stop fishing in areas where we live.

Please take action before it is too late!
