

Save the Dolphins

by Wong Sze Nga Annie, 6B

I am a friendly dolphin and I am writing because we are facing a lot of problems and we need your help very much.

The first problem we are facing is reclamation. You keep turning sea into land. Therefore there are fewer places where we can live. We will have nowhere to live unless you stop turning sea into land.

The second problem we are facing is water pollution. You keep dumping toxic waste and throwing a lot of rubbish into the sea. Therefore we become ill and die. We will become extinct unless you stop dumping toxic waste into the sea.

The third problem we are facing is fishing. You keep fishing in areas where we live. Therefore there are very few fish for us to eat. We will become hungry unless you stop fishing in areas where we live.

Please take action before it is too late!
