

My Favourite Transport in Hong Kong

My favourite transport is LRT. I take it to go home. I take it twice a week. I like travelling by LRT because it is cheap. It costs two dollars only for students. It is also cool because there is air-conditioning. Although travelling by LRT is cheap for students, it is expensive for adults.

Moreover, travelling by LRT is slow. I wish it could be as fast as a plane. I also hope that the fare will be as cheap as the tram's for both students and adults.

We should not eat or drink and we should talk softly on LRT. I have seen people eating fish balls on LRT for many times. The car was as dirty as a rubbish bin. We should keep the car clean.
