

My Dream Job

I want to be a manager when I grow up because it is a very exciting job and I can have high salary. If I become a manager, I'll help people who have questions. Besides, I can monitor the junior staff.

Managers need to be outgoing. They also need to be understanding and patient too so that they can solve people's problems. They also need to have high qualification so that they can tackle problems easily.

I think this job is suitable for me because I am hard-working and experienced. I hope I can be a manager some day.
